Quality Solutions. Expert Support. Since 1988.

www.macsales.com

There's a word used here at OWC that can succinctly define the world we live in.

Possibilities.

What we as humanity can achieve is unlimited if we put our hearts and souls into our efforts. It is my great blessing every day to watch the OWC team pour their passion into our products and services so we can provide you with unlimited possibilities in our digital world.

With lessons learned during my rural childhood, OWC's 'natural' modus operandi since 1988 has been to maximize the usefulness of existing resources. We achieve that by helping you obtain the longest use life from your technology investment with upgrades, accessories, and external solutions built to last the test of time. That's accomplished while maximizing our own use of resources required to serve and support you daily. Operating in this sustainable manner improves our shared world and gives you the most value for your hard-earned money.

As we create new OWC technologies, we also look back to historical systems and solutions that can once again solve problems that affect us all. We supported the 2020 critically acclaimed environmental documentary *Kiss the Ground*. Beyond using our Jupiter NAS to solve film production bottlenecks and stability issues, we recognized the need to help tell others about time-proven soil regeneration, ecology, and regenerative agriculture. It's very satisfying for us to know this film and the Kiss the Ground organization have touched over one billion people globally and prompted the United States Department of Agriculture (USDA) to put $20 billion toward soil health. In just the past three years, we've gone from less than 50,000 acres being managed regeneratively to over 32,000,000.

We've partnered with the *Kiss the Ground* organization because we share its core belief in creating a solid problem-solving solution vs. a temporary symptom relief. Regenerative agriculture isn't just a hot current topic, it's a world improving answer. And this message is on the big screens again with a much-anticipated sequel.

Common Ground reveals how politics, power, and profit all affect the current food system. There is a story of hope, however, in how farmers of diverse backgrounds are using regenerative agriculture to stabilize our climate and improve our health. The goal of this film is to drive the next 100 million acres of US land to utilize regenerative practices. The benefits, of which only 4% of the USA population are aware of, have incredibly positive and measurable outcomes including: Less water use. Coastal ecosystem protection (reduced runoff damage). Higher caloric production and nutritional quality per acre. Long term higher crop yields without chemicals. Improved quality of life with lower health care costs. Carbon sequestration that can bring the entire world to carbon drawdown within a decade. I invite you to view both these films to educate yourself on the possibilities this important issue can have for generations.

While talking about sustainability and the environment, it's important to discuss this catalog. We send it to you because you've told us it's something you look forward to receiving annually and adding it to your collection. As one of the most recycled materials in the U.S., paper is a practical and sustainable choice for messaging. With 94% of Americans having access to a recycling program, please "pay it forward" by sharing or recycling this catalog when you are finished with it.

While there is incredible potential directly under our feet, there are some amazing possibilities when we lift our eyes to the stars. OWC began its foray into space exploration in 2011 by becoming the storage provider to "The Last Shuttle Project". In 2020, our Envoy Pro FX carried customer, partner, and employee content into space and back onboard a Blue Origin New Shepard rocket. And now in 2023, having served as storage adviser to Galactic Legacy Labs, I'm excited for our role in a payload that should have launched by the time you're reading this. This payload will be landing on the Moon with an amazing data set of humanity etched in nickel so it can serve as a time capsule for a millennium. A few years ago, some of you took part in 'Lunagrams' that are part of this data set. Space is the next frontier and the technology to explore space also drives huge benefits for how we take care of the blue gem that I hope will always be our true home.

Our Moon is the key to future space exploration. Its South Pole contains vast quantities of water in the form of ice. Just like sustainability is a big part of everyday operations at OWC, water is a major component of sustainability in space. It serves as coolant for equipment, is used in rocket fuel, and perhaps most importantly, can be broken down into breathable air and drinkable liquid.

What's also exciting about recent and future planned moon focused exploration is that we may be facing a new dawn of international fellowship and partnership. Life could imitate art with humankind mirroring Star Trek's underlying theme of peaceful cooperation, co-existence, and exploration. We have a lot of differences to solve, but so much potential together. That theme reminds me of OWC's previous involvement with the John Lennon Educational Tour Bus and the last verse in Lennon's Imagine song:

You may say I'm a dreamer

But I'm not the only one

I hope someday you'll join us

And the world will live as one

God Bless you all and from the entire team around the world, we wish you a Merry Christmas, Happy Holidays, and a 2024 filled with infinite peace and possibilities.

Larry O'Connor,
Founder and CEO, OWC

TABLE OF CONTENTS

Holiday Specials

Apple HomePod mini: Big Sound, Big Savings

Small and powerful home speaker with amazing audio & assistant.

Available in:

from $99.99 $78.99
$20.01 Holiday Savings!
as low as $20.00 per month

Apple Genuine Lightning Cables - 1.0M or 2.0M; USB-A or USB-C

Replace a worn out cable or grab a spare for on the go. Safety tip: don't use a frayed cable.

now starting from $19.00 $6.49
75% Holiday Savings!

325GB OWC Atlas Ultra CFexpress Memory Card

High-quality extreme 1300MB/s sustained performance for pro photo and cinema-quality video up to 8K.

from $289.99
up to 50% Holiday Savings Online!
Monthly payment options available
View all Atlas cards on p.05

64GB DDR4-2400 Memory Kit for Apple 27-inch 5K iMac 2019

16GB x 4 Kit to add 64GB to iMac or split the kit & upgrade 2 iMacs.

only $147.96 $139.99
as low as $34.00 per month

OWC 14-Port Space Gray Thunderbolt Dock

Take your workstation workflow to the next level with 14-ports of connectivity. Charge your laptop too!

only $199.99
29% Holiday Savings!
as low as $19.00 per month

SECTION 01

Capture

KEY OWC DIFFERENCES
EXPLAINED

QUALITY IN = QUALITY OUTPUT

Our extremely thorough quality control process stresses Atlas memory cards to their limit in the highest settings of high-end cameras. This strict attention to detail ensures you can depend on reliable and consistent peak performance for your irreplaceable content.

DEPENDABLE UNDER DEMANDING CONDITIONS

You can shrug off the toughest environmental challenges like x-rays, shocks, and bends when you're capturing in the field with Atlas memory cards. Our cards are even tough enough to be IP67 dustproof and waterproof rated. Now you can shoot, store, and swap with total peace of mind because Atlas cards have your work — and your back — well protected.

IT JUST WORKS™ COMPATIBILITY

There's no guesswork when you use an Atlas memory card. Our dedicated in-house testing lab features a huge assortment of past and present DSLR and mirrorless cameras to ensure maximum compatibility. We also test verify backwards compatibility with previous generations of devices and readers. When you capture with OWC, you know *It Just Works*.

> "The OWC cards and reader helped my workflow insanely....and helped me finish my day faster, stronger and better than products I've used in the past."
>
> **— Emily Tidwell,**
> Action Sports Photographer

Memory Cards

Atlas Pro
SD V60

Ideal for your most common photo and general video capture uses including high resolution RAW photography at moderate burst rates and up to 4K video recording. Offering the perfect balance of quality, speed, and affordability, this professional-grade card blows away low priced, entry-level V30 cards.

64GB – 1.0TB from **$21.99**

DESIGNED FOR

- General prosumer
- Business content creators
- Social media influencers
- Pro photo and video creatives

Atlas Ultra
SD V90

Designed to meet the most advanced use-cases of professional content creators including high burst image sequence RAW photography and high bitrate 4K and 6K video recording. With minimum 90MB/s sustained recording speeds guaranteed, you don't have to worry about dropped frames or missing footage. When you have a high-end SD memory card-based workflow or want to use your camera's maximum video setting allowed by an SD card, take it to the Ultra level.

64GB – 512GB from **$64.99**

DESIGNED FOR

- Advanced action sports photographers
- Advanced outdoor/ wildlife photographers
- Individual pro photo & video creatives with advanced cameras & camcorders
- Video creatives with advanced cameras & camcorders
- Independent/small film production companies

Atlas Pro
CFexpress Type B 4.0

The cost-effective choice for most professional workflow needs including fast burst RAW image sequences and high-bitrate video recording up to 6K. Whether you're a photographer or a filmmaker using one of the latest pro video cameras, this memory card can deal with any workflow need.

256GB – 512GB from **$169.99**

DESIGNED FOR

- Action sport and wildlife photographers
- Professional video cameras up to 6K resolution
- Individual content creators/ small production companies
- Old Nikon DSLR based on XQD media cards that now support CFexpress cards

NEW!

Atlas Ultra
CFexpress Type B 4.0

Perfect for your most demanding video recording and extreme action photography settings. With minimum sustained write speeds up to 1500MB/s, you can reliably capture 8K RAW video with your top-of-the-line cinema camera. It's the perfect media card for pro filmmakers and extreme action photographers to unleash their camera's capabilities.

1.0TB – 2.0TB from **$579.99**

DESIGNED FOR

- High-volume action sport and wildlife photographers
- Professional filmmakers
- High-end cinema cameras
- Professional content creators/production companies/feature films

NEW!

Atlas Dual SD Card Reader

USB-C DUAL-SLOT SDXC UHS-II CARD READER

Compact bus-powered dual slot SD memory card reader that helps professional photographers, filmmakers, DITs, and content creators work smarter and more efficiently.

- **BROADLY COMPATIBLE**
  Plug and play with USB-C equipped Mac, Windows, and Linux computers; iPads, and Chromebooks.

- **EFFICIENTLY FAST**
  Ingest two SDXC UHS-II memory cards simultaneously at over 300MB/s per card.

- **DESKTOP-READY**
  Second USB-C port for longer cable use at studio/home office with built-in protection if accidentally connected to power supply.

- **SAFE**
  Write-protection switch prevents unwanted file deletion, card formatting, and data written in both slots.

- **STABLE**
  Non-skid rubber feet keep reader in place with OWC ClingOn support to secure your USB-C cable.

only $79.99

Atlas FXR

THUNDERBOLT + USB CFexpress CARD READER

Sized similarly to a debit card, the Atlas FXR easily fits into the smallest camera bag. It's bus-powered via the included Thunderbolt cable with tethered USB-A adapter so it simply works wherever you take it.

- **ULTRA-COMPACT**
  About the size of a debit card and up to 7x smaller than other single readers.

- **PLUG & PLAY**
  Includes a Thunderbolt (USB-C) cable with a tethered USB-A adapter.

- **BROADLY COMPATIBLE**
  Plug and play with past, present, and future Macs, Windows and Linux PCs, iPads, Chromebooks, Android devices, and Surface devices.

- **READ AT WARP SPEED**
  Ingest video footage and photos at over 1600MB/s.

only $99.95

> "The team is more motivated, excited and happy because the Atlas cards and Envoy drives are allowing us to finish our day a lot quicker."
>
> — **Adam Sims,** Nature Photographer

The OWC Atlas Ecosystem

QUALITY. PERFORMANCE. ASSURANCE.

Planning and executing a professional shoot is costly and time consuming. After all your hard work, the worst nightmare of dropped frames, jittery playback, or corrupt files is simply not an option.

Because we too are content creators, we understand when you are in the capture phase of your creative project, you are documenting priceless moments. That's why we've spent years designing a complete ecosystem of solutions to give you peace of mind in your workflow.

From memory cards to custom software apps to card readers, the Atlas ecosystem delivers something greater than the sum of its parts.

Atlas Dual CFexpress + SD Card Reader

USB-C DUAL-SLOT CFexpress TYPE B AND SDXC UHS-II CARD READER

Improve your workflow efficiency with maximum versatility by ingesting two different memory cards simultaneously.

- **BROADLY COMPATIBLE**
  Plug and play with USB-C equipped Mac, Windows, and Linux computers; iPads, and Chromebooks.

- **EFFICIENTLY FAST**
  Ingest your memory cards at up to 1032MB/s.

- **TRAVEL-READY**
  Bus-powered with integrated cable that tucks away when not in use.

- **DESKTOP-READY**
  Second USB-C port for longer cable use at studio/home office with built-in protection if accidentally connected to power supply.

- **POCKET-SIZED**
  Sized and weighs like a small smartphone for easy portability.

- **SAFE**
  Write-protection switch prevents unwanted file deletion, card formatting, and data written in both slots.

- **COMPLETE**
  Includes Innergize™ health, performance, and field upgrade management tool when using OWC Atlas memory cards.

only $79.99

Atlas CFast Card Reader

USB-C/USB-A CFast 2.0 CARD READER

Massively boost your workflow efficiency by accelerating offloads and starting post-capture edits faster.

- **FLEXIBLE COMPATIBILITY**
  Works with past, present, and future USB equipped Macs, Windows and Linux PCs, iPads, Chromebooks, Android devices, and Surface devices.

- **ACCELERATES OFFLOADS**
  Ingest RAW photos and large format video files at over 550MB/s.

- **ULTRA-COMPACT**
  Weighs less than two ounces and slips easily into your pocket.

- **FIELD-READY**
  Bus-powered, no power supply or power cable needed.

- **SILENTLY COOL**
  Fanless, thermally efficient design keeps you working at top speed.

- **PLUG AND PLAY**
  Connect to everything with the included combo USB-C/ USB-A cable.

only $34.99

TRUST.

Every time you are on set or in the field, you can work confidently knowing the Atlas ecosystem will deliver perfect data capture and optimal performance. OWC is the only manufacturer that provides a complete solution to ensure:

- Your card will work with your camera at its highest settings every time it has been sanitized using Innergize.

- Your transfer speed will be at maximum performance because Atlas readers will not overheat.

- Your copy will complete and be fully verified with checksum integrity via Copy That.

- Your fear of dropped frames, corrupt copies, and glitches in your footage is eliminated.

INNERGIZE

Innergize Your Workflow with Highest Performance and Reliability

OWC Innergize™ is the first stage of the Capture to Completion™ ecosystem of OWC products designed to seamlessly propel professional photographers, videographers, and content creators to the highest level of workflow performance and reliability. This OWC custom-designed app is a complete health, performance, and field upgrade management tool when using OWC Atlas memory cards with OWC Atlas readers and reader equipped OWC docks and storage/connectivity solutions.

Work with Maximum Confidence and Reliability
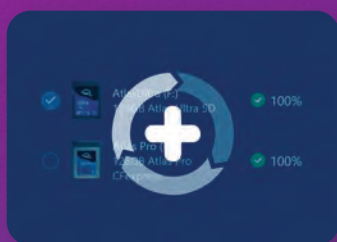

HEALTH

Over time and use cycles, flash memory does wear out. Innergize verifies and reports the percentage of use life remaining. Now you can work with full confidence your OWC memory card will deliver the reliability you can trust.

SANITIZE

Writes, deletes, and formatting all take their toll on memory cards. Innergize cleans and restores the flash memory performance of OWC memory cards so you can get the best results on every use.

FIELD UPGRADE

When new cameras or firmware updates to existing cameras are introduced, they may not work properly with flash memory cards. Innergize gives you the ability to quickly upgrade your Atlas card firmware in the field for full compatibility, additional performance enhancements, and bug fixes for optimal reliability.

OWC Cable Central

YOUR ONE-STOP-SHOP FOR ALL OF THE COMPUTING CABLES AND ADAPTERS YOU NEED.

All Lightning Cables are 100% Apple MFi Certified.
No cheap stuff here. Just amazing deals!

for all Thunderbolt / USB-C port connections

Secure and protect cables for workflow peace of mind.

2-Pack $13.95 | **5 Pack** $24.85 | **10-Pack** $39.85

SECTION 02

CREATE

KEY TECHNOLOGIES
EXPLAINED

WHICH INTERFACE IS RIGHT FOR YOU?

USB-C, Thunderbolt, USB4...the choices can be confusing and overwhelming. That's where you need a trusted technology solutions provider like OWC to help you make sense of it all.

USB-C is a connection type. Thunderbolt and USB4 are communication standards that provide a set of features for a computer to interact with devices through that USB-C connection.

Thunderbolt 4 is always 40 Gigabits per second, while **Thunderbolt 3 and USB4** can operate at either 20 or 40Gb/s. The difference between Thunderbolt 3 and USB4 is purely in the name.

For everyday personal computing uses, our USB-C equipped drives and docks offer an attractive balance of price and performance up to 10Gb/s. If you require pro-grade speeds up to 40Gb/s and multiple high-resolution displays, Thunderbolt is your ticket.

BE YOUR BEST WITH THE BEST

M&E pros call our ThunderBlade transportable RAID SSD the best production drive in the universe. At its heart are two cutting-edge technology standards: NVMe and PCIe. Non-Volatile Memory Express (NVMe) optimizes the performance of flash technology over the Peripheral Component Interconnect Express (PCIe) standard. With a more direct and optimized path to a computer's processor, PCIe enables maximum SSD performance. Tying both technologies together is the Thunderbolt interface which uses the PCIe bus.

TRUTH IN NUMBERS

We understand your workflow requires real-world speed you can count on. Instead of promoting eye-catching maximum theoretically possible performance numbers, we take the time-consuming step to run our storage solutions through intensive performance testing and share our test parameters in the results. By truthfully listing the speeds we observed, our commitment to the "OWC Difference" ensures an OWC solution will deliver the performance you require and expect.

Docks & Connectivity

USB-C Travel Dock E

BUS-POWERED / USB-C

The perfect mini-sized dock to connect, charge, and display on the road, in the office, and at home.

- **SEE THE BIGGER PICTURE**
  Display connections up to 4K resolution.
- **POWERFUL OPTIONS**
  Up to 100W pass-thru power.
- **TAKE ANYWHERE**
  Palm-sized, ultra-portable, and built-in cable storage.
- **COMPATIBLE**
  Use with any Mac, iPad, PC, or Chromebook with an available USB-C port.

only **$59.99**
as low as $15 per month

6 PORTS OF CONNECTIVITY

- (2) USB-A 5Gb/s
- (1) HDMI
- (1) Gigabit Ethernet
- (1) SD 4.0 card reader
- (1) USB-C power pass-thru

★★★★★

Great for reviewing photos
"I like to quickly review photos while in the field. I can attach this dock directly to my iPad Pro's USB-C port and then use an OWC SSD and CFexpress card reader."

14-Port Thunderbolt Dock

THUNDERBOLT 3 AND 4 EQUIPPED SYSTEMS INCLUDING MACS, PCS, AND IPAD PRO

Through a single cable, the 14-Port Thunderbolt Dock brings an unprecedented combination of ports, convenience and power.

- **CONNECT MORE DISPLAYS**
  Connect two 4K displays or one 5K display.
- **MEDIA FRIENDLY**
  Front SD and microSD slots for fast media imports.
- **LISTEN UP**
  Jacks for headphone, mics, speakers and other audio gear.
- **GIGABIT ETHERNET**
  Perfect for high-speed wired networks.
- **DAISY-CHAIN**
  Up to five additional Thunderbolt devices.
- **COMPATIBLE**
  Use with any Mac, iPad, or PC with an available Thunderbolt port.

only ~~$279.99~~ **$199.99** - **Incredible connectivity for the best price per port!**
as low as $19 per month

14 PORTS OF CONNECTIVITY

- (2) Thunderbolt 3
- (5) USB-A (10Gb/s)
- (1) USB-C (10Gb/s)
- (1) SD 4.0 card reader
- (1) Micro SD 4.0 card reader
- (1) mini DisplayPort 1.2
- (1) Hybrid 3.5mm headphone/mic jack
- (1) S/PDIF digital audio out
- (1) Gigabit Ethernet

★★★★★

Great dock
"This dock has been excellent. It has all the different types of connections that I need. The best part is the OWC eject app that can quickly dismount volumes attached to the dock. A winner in my book..."

11-Port Thunderbolt Dock

THUNDERBOLT 4 / THUNDERBOLT 3 / USB4 / USB-C

The connect-it-all solution for past, present, and future devices and accessories.

- **REINVENTS THE DAISY CHAIN**
  Create multiple independent "tree branches," connect multiple bus-powered devices.
- **11-PORT EXPANSION**
  Add more full speed and fully functional Thunderbolt ports to your computer.
- **ADD MORE DEVICES**
  Connect more storage, up to two 4K displays or one 5K/6K/8K display, accessories... you name it, you can use it.
- **MORE POWER**
  Up to 96W of laptop charging power.

only $229.99
as low as $21 per month

11 PORTS OF CONNECTIVITY

- (4) Thunderbolt 4 (40Gb/s)
- (3) USB-A (10Gb/s)
- (1) USB 2.0 (480Mb/s)
- (1) Gigabit Ethernet
- (1) SD 4.0 card reader
- (1) 3.5mm headphone jack

★★★★★

Best TB-4 dock
"This has to be the best thunderbolt 4 dock. It's got plenty of ports, plenty of power, and it just works reliably."

Thunderbolt Pro Dock

THUNDERBOLT 3 AND 4 EQUIPPED SYSTEMS INCLUDING MACS, PCS, AND IPAD PRO

Convert your laptop into a workstation powerhouse with world-renowned OWC reliability and ease-of-use. Connect to practically anything all while charging your laptop through a single cable.

> Powerful Connectivity and the only Dock to provide high-speed Ethernet up to 10Gb/s (backwards with slower speeds) and fully AVB compatible.

- **FAST & DIVERSE**
  Transfer files fast, daisy chain with Thunderbolt, connect USB devices, add displays.
- **FULL THROTTLE BANDWIDTH**
  Share / stream up to 90% faster with 10Gb/s Ethernet.
- **AVB READY**
  Perfect for use in pro audio and video with critical data synchronization.
- **INGEST CONTENT**
  Easily handle multiple video and photo card uploads up to 1,630MB/s.
- **ADD MORE VIEWSPACE**
  Connect two 4K displays or up to a single 8K display.

only $349.99
as low as $32 per month

★★★★★

Lots of options
"Very well constructed and it provides a lot of connectivity + has a built in CFexpress reader."

- **POWERFUL**
  Keep your notebook mobile use ready with 85W charging power.
- **COMPATIBLE**
  Use with any Mac, iPad, or PC with an available Thunderbolt port.

10 PORTS OF CONNECTIVITY

- (2) Thunderbolt 3 (USB-C)
- (1) 10 Gigabit Ethernet
- (1) USB-C (10Gb/s)
- (3) USB-A (10Gb/s)
- (1) DisplayPort 1.2
- (1) CFexpress card reader
- (1) SD 4.0 card reader

OWC CONNEC

Universal USB
Plug into Macs, PCs, iPads, Chromebooks, docks, and hubs with:

- USB 3 / USB-A ports

"Happy with my purchase, and the quick delivery."

Gemini + ThunderBay Flex 8

★★★★★

Excellent product!
"Versatile and essential part of my workstation setup. More quality from OWC!"

Create More Efficiently with the "All in Wonders"

Gemini and ThunderBay Flex 8 provide a unique combination of storage and docking convenience in a single desktop solution. That's why many pros call them the "all-in-wonders."

With dual drive bays, hardware RAID, and seven connectivity ports, Gemini is the do-it-all tool for audio editors/musicians/producers, individual content creators, photographers, small photography studios, and filmmakers. You'll have plenty of room to duplicate footage, create and manage archives, or render and process effects. Organize your digital life by connecting your favorite peripherals. Ingest the day's shoot or drone footage with the frontside reader. Work up to 2.5x faster over wired networks and enjoy increased productivity in an IP-based workflow with 2.5GbE.

When you feel the need for speed, space, and selectability, the eight bay ThunderBay Flex 8 is the one Thunderbolt RAID storage solutions that rules them all. This highly configurable productivity platform is ideal for digital imaging, VFX, video production, and video editing professionals. Offering unrivaled Flexibility, you can use a mix of SATA/SAS and U.2/M.2 NVMe drives, enjoy eight ports of docking convenience, and expand your capabilities by adding a video capture card, audio card or high-speed networking card to the Flex 8's PCIe slot. There's nothing else like the ThunderBay Flex 8 that gives you all this workflow flexibility on the market today.

Gemini

UP TO 6-DRIVES / THUNDERBOLT 40GB/s / PORTS

- **FLEXIBLE STORAGE OPTIONS**

as low as $232.06 per month

Full Customizable Options from **$1,399.99**

Our solutions go through countless hours of ongoing development testing. We pursue costly and lengthy certification processes from partners like Intel to ensure we meet their stringent Thunderbolt and EVO requirements.

And then we get out of the lab and go real world on our solutions. We drop them in water, throw them down stairs, roll over them with a SUV, and even send them into space aboard a Blue Origin New Shepard rocket.

Some drives are made to be a low-cost, mass-produced commodity. We do it differently because the reliability of your data is our #1 priority.

owc.com/22w20b

> Many companies ask me to test their portable SSDs, but most usually reconsider after I warn them my testing involves attempting to overheat and destroy the device's controller.
>
> Very few companies make external products which I can't find a way to easily kill.
>
> At CES, I talked to Other World Computing and they didn't get scared away when I warned them about how I test portable SSDs with the intent on destroying them. Their unit actually passed my testing. It ain't cheap, but it's rugged and built to handle any sort of workload you throw at the drive.

OWC SoftRAID

Incredibly Powerful, Easy-To-Use, RAID Management and Protection. For Mac and Windows.

OWC SoftRAID is powerful yet easy-to-use RAID software that maximizes drive capacity, offers faster performance, and protects you from data loss. It's ideal for voluminous data roles including audio/video production and editing, photography, graphic design, database servers, financial applications, and more.

SoftRAID goes beyond other RAID solutions, including hardware RAID with its intuitive interface and drive health monitoring features that alert you if your drives begin to have problems.

SoftRAID protects your data from start to finish.

BEFORE USING A DISK

When you buy something new, you expect it to work flawlessly. Unfortunately, that isn't always the case. Problems happen with new cars, new appliances, even new computer hard drives. SoftRAID's Certify feature makes sure your drives are in pristine condition by writing a random pattern of data to every sector and reading it back. You are protected before you write your first byte.

WHILE USING A DISK

Once you are up and running, SoftRAID monitors dozens of drive data points like how many times the drive has spun up, how many hours is has been used, how many errors it has encountered and many, many more. SoftRAID takes these metrics and builds a robust picture of the overall drive health and will warn you before potential issues arise. It's like having a drive doctor on call 24/7.

AFTER A DISK FAILS

SoftRAID's multiple RAID levels let you design the prefect data storage solution for your workflow. With the redundant protection that RAID 1 gives you or a mix of speed and protection that RAID 4/5/1+0 (10) offer, SoftRAID is always protecting your data. If a drive does fail, SoftRAID's accelerated rebuilds get you back up and running quickly.

When you need maximum volume capacity, optimal drive performance or a combination of attributes, look no further than OWC SoftRAID. Once it's installed, activated, and configured, you can rest easy knowing your data is protected and ready to when you need it. You'll wonder how you ever felt safe storing your data before OWC SoftRAID.

FREE Test Drive

Check out the power of OWC SoftRAID by downloading a FREE fully-functional 14-day trial:

- Test disks to make sure they're reliable
- Create new RAID volumes
- Convert your existing Disk Utility and AppleRAID volumes
- Setup the SoftRAID Monitor to monitor the health of your disks and volumes

U2 Shuttle

4-SLOT / NVMe M.2 TO U.2 CARRIER SHUTTLE

The OWC U2 Shuttle is everything you've wanted in a multiple blade SSD but couldn't get until now. It is the world's first shuttle for four NVMe SSDs that easily inserts into 3.5-inch drive bays. Built for OWC storage and PCIe expansion solutions, this innovative carrier shuttle can also be used with PCs and servers with U.2 drive bays.

- **CONFIGURABLE**
  Choose from preconfigured solutions or add your own NVMe M.2 2280 SSDs.

- **RAID-READY**
  RAID 0, 1, 4, 5, or 1+0 (10) gives you speed, protection, or the best of both attributes.

- **COMPATIBLE**
  Use with OWC Mercury Helios 3S equipped with U.2 NVMe Interchange System, ThunderBay Flex 8, and Mercury Pro U.2 Dual, as well as any computer with NVMe U.2 support in an available 3.5-inch drive bay.

- **EASY SWAPS**
  Move between OWC U.2 devices, as well as PCs, enclosures, and servers.

- **MEDIA WORKFLOWS**
  Dramatically lowers production-to-lab shipping larger, heavier drives.

- **SECURE**
  Key lock for data security compliance.

Go beyond your wildest dreams and into the most demanding applications imaginable with certified reliability. From M&E post-production, to real-time AI, to huge dataset climate research… you now have the power to confidently reach higher.

- **REVOLUTIONARY**
  The fastest drive available for 2019 Mac Pro, Windows or Linux computers.

- **MIND-BLOWING PERFORMANCE**
  Up to 12,000MB/s speeds with PCIe Gen 3 Mac Pro models today.

- **FUTURE UPGRADEABLE**
  Up to 30,000MB/s in Gen4 PCIe.

- **MASSIVE SPACE**
  Up to eight NVMe SSDs for jaw-dropping storagte capacity.

- **BLEEDING EDGE DESIGN**
  Utilizes the full bandwidth of the latest PCIe technology.

- **MULTI-RAID**
  Supports multiple RAID levels and RAID sets for maximum flexibility.

- **SOFTRAID XT**
  Up to nine NVMe SSDs for jaw-dropping storage capacity.

- **WORKS INSIDE**
  Mac Pro (2019—Current) and PC Towers.

4.0TB-64TB from **$1,379.99**
as low as $125 per month

Aura Pro III

PCIe 3.0 / NVMe M.2 2242 SSD

The fastest NVMe M.2 SSD solution for ultrabooks, notebooks, AIO computers, Chromebooks, mini PCs, and external drives.
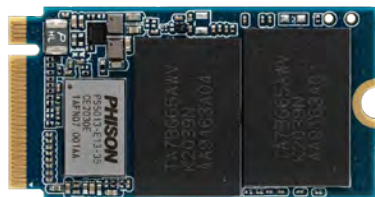

- **CLASS LEADING PERFORMANCE**
  Up to 2771MB/s for faster pro A/V workflows, video streaming, system responsiveness, back-ups, app/gaming load times, and more.

- **COMPACT SOLUTION**
  The best choice for computers and devices that utilize a 2242-sized M.2 SSD.

- **ADVANCED TECHNOLOGY**
  The latest flash management design for the highest reliability, performance, and longevity.

240GB-2.0TB from **$44.99**
as low as $15 per month

OWC Accelsior 1M2

PCIe 3.0 NVMe M.2

The speed-boosting, capacity-expanding PCIe NVMe SSD for content creators, performance enthusiasts, and gamers.

- **TEST-CERTIFIED**
  Verified compatible with 2019 Mac Pro, as well as 2012/2010 Mac Pro and PC towers.

- Up to 3200MB/s for bandwidth-heavy video, audio, photography, and design needs.

- Near instant start-up and business critical app launching.

- Real-time processing of intensive transfer tasks like multi-stream video editing.

- Shorter render, capture, and process times in video suites like Adobe Premier, Final Cut Pro/Pro X, DaVinci Resolve, and Avid Pro Tools.

- Quicker production capabilities in photo and audio platforms like Adobe Photoshop, Lightroom, and Apple Logic Pro X.

- Faster game level-loading, responsiveness, and save times.

- **SLOT-POWERED**
  No extra power cables needed.

240GB-8.0TB from **$74.99**
as low as $19 per month

PCIe Slots Storage Nirvana

BOOT ON STOCK. WORK ON OWC ACCELSIOR AND PUT A DENT IN THE UNIVERSE.

OWC Accelsior 4M2
PERFECT FOR MAC PRO 2019 / TOWERS

Flex 1U4

4-BAY / THUNDERBOLT 3 / DOCKING / PCIe EXPANSION

Go beyond the desktop with the most flexible storage, docking, and PCIe expansion solution for any rackmount use.

- **DRIVE DIVERSITY**
  Use SATA/SAS and NVMe U.2/M.2 drives for up to 92TB of capacity and real-world Thunderbolt speeds up to 2750MB/s.
- **DRIVE FLEXIBILITY**
  Swap drives quickly and easily if/when needed.

- **GET MAXIMUM**
  Utilize NVMe U.2 SSDs as well as the OWC ecosystem of U.2 drives and adapters for incredible speed and flash density per bay.
- **POWERFULLY EASY RAID**
  Create, manage, and monitor advanced RAID sets with OWC SoftRAID.

16TB-92TB from $1,679.99
as low as $152 per month

Archive Pro

LTO-7/8/9 / THUNDERBOLT 3

Tape archiving solution for M&E pros, corporations, government branches, and small businesses seeking to preserve critical data.

- **STORE MORE**
  Up to 12TB native and up to 30TB compressed storage capacity per tape cartridge.
- **STORE LONGER**
  Up to 30-year tape longevity.
- **LTFS COMPATIBLE**
  Archive files/folders with drag and drop ease.
- **SECURE**
  Supports AES 256-bit encryption for sensitive data.
- **COMPLIANCE READY**
  Supports WORM cartridges required by legal and regulatory record keeping.

1.0TB-16TB from $4,679.00
as low as $423 per month

WWW.MACSALES.COM

Why OWC Storage?

"We're using ThunderBays and SoftRAID. We record every performance at 96kHz, so we need a lot of hard drives. Reliability is huge for us. If we're on tour overseas and we have to bring in a piece of gear into the workflow, it has to just work."
—Billie Eilish music technician Trevor Jackson

Anyone can put a bunch of components in a housing and call it a drive. OWC is not just anyone.

We're a group of filmmakers, musicians, designers, content creators, and parents just like you wanting to capture and preserve that irreplaceable moment. That's why we've been creating portable to desktop storage solutions for over three decades with a singular goal: ultimate reliability.

We put expert care into building something worthy of your trust. To perform as expected and always protect your data. Because that's what we want for ourselves.

Everything we do is focused on quality control. From design to build to full qualification testing of every hard drive or SSD that we choose, we make sure OWC storage solutions will stand the test of time.

We take pride in hearing from customers that they have an OWC solution from 10 and even 15 years ago and it's still meeting their needs and protecting their data.

OWC

NAS (Network Attached Storage)

Jupiter Mini

High-performance 10GbE desktop NAS with industry leading reliability and support designed for small business and workgroups.

Your time is better spent running your business, not troubleshooting shared storage. The OWC Jupiter Mini is the reliable desktop-sized NAS powerhouse for file sharing in small business, education, research and creative content. Jupiter Mini is easy-to use without an IT person, becoming a time and money-saving enterprise grade storage solution that includes professional support.

- Up to 100TB of internal RAW storage
- Up to 50+ connected users
- Quiet 5-bay desktop design
- 2 X 10GbE + 2 x 1GbE built-in
- Reliable and automatic data integrity
- Easy-to-use enterprise OS

20TB only **$2,999.00**
as low as $271 per month

40TB only **$3,799.00**
as low as $343 per month

80TB only **$4,599.00**
as low as $416 per month

100TB only **$5,499.00**
as low as $497 per month

Jupiter Callisto

Scalable rack NAS up to 100GbE with high-capacity SSD + HDD storage for commercial and enterprise.

For teams who need a secure, centralized powerhouse for file sharing, the OWC Jupiter Callisto is here to be your dependable backbone. Jupiter Callisto supports 100+ connected users for commercial, enterprise, education, research and creative content environments. Better yet, you can expand Callisto with up to 2.5 Petabytes of expanded RAW storage — all without requiring an IT person.

- 2U+ 3U rack designs.
- Up to 320TB of internal RAW storage, all-flash available.
- Expand up to 2.5PB of RAW storage.
- Up to 100+ connected users.
- 2 x 10GbE built-in, 40 /100GbE capable.
- Reliable and automatic data integrity.
- Easy-to-use enterprise OS.

Up to 320TB (Internal, 2.5PB Expanded)

from $10,799

Jupiter Kore

Mini-SAS HD connected SSD + HDD direct attached storage / NAS expansion solution.

Expand your workflow with the massive capacity, performance, and dependability of OWC Jupiter Kore. Jupiter Kore can expand the storage of your current NAS or direct attached solution without losing data, speed, or reformatting. Combining the Jupiter Kore with the Jupiter Callisto NAS can create a server with up to 2.5 Petabytes of RAW storage.

- 2U + 3U rack designs.
- Up to 320TB of internal RAW storage, all-flash available.
- Expand up to 2.5PB of raw storage.
- 12GB mini-SAS HD interface ports.
- Connect any server that supports SAS ports.
- Professional OWC support included.

Up to 320TB (Internal, 2.5PB Expanded)

from $7,099

Streamlining the Post Production Process for
Netflix's *Kiss The Ground* Doc
with OWC Shared Storage

Kiss the Ground (KTG) is an illuminating film that provides an important look at the state of climate change and our environment. KTG's post-production team was enabled by OWC's high-performance Network Attached Storage for nearline 4K editing and high-volume coldline storage for archive.

SECTION 03

Collaborate

KEY TECHNOLOGIES
EXPLAINED

TAKE THE COMPLEXITY
OUT OF COLLABORATION

Jellyfish is all about easy setup and management, and it has powerful tools to achieve this. Jellyfish Connect automatically connects your users and only reveals the assets they have access to. Jellyfish Manager makes it super easy to control your Jellyfish remotely, set up users and permissions, build shared pools, customize network settings, and connect to the Cloud.

We want to make sure your team spends its time making content with its shared storage instead of trying to figure out how to connect to it.

ENHANCE YOUR PRODUCTIVITY

There's nothing worse for your team's creative flow than seeing a spinning beach ball every time they press the space bar. All Jellyfish solutions are specifically designed to support demanding media workflows. Our dynamic caching technology allows you to ingest at high speeds while simultaneously editing 4K, 8K, or 12k content. Our HDD solutions have a dedicated NVMe pool for render and cache files. And our flagship Jellyfish XT separates the metadata from your media files to ensure the highest possible throughput with no latency.

Your team's time and productivity equals money, and OWC takes that seriously.

SECURE YOUR FUTURE

When you invest in the best possible shared media solution for your creative team, you want to make sure it can grow with your needs. Our highly optimised ZFS-based File System allows our solutions to easily scale both in capacity and performance. And the Jellyfish software suite gives your team everything they need to tackle any workflow challenges today, and tomorrow: media asset management, server-based proxy creation, easy remote access, automated nearline backups, and deep archiving.

With over 650 high-profile clients around the world, from branded content creators to global broadcasters, we make sure that our technologies stay ahead of the curve so you can stay on top of the game.

Jellyfish Shared Media Storage

Jellyfish Nomad

ALL THE PERFORMANCE AND RELIABILITY YOU NEED, EVERYWHERE YOU GO.

The Jellyfish Nomad is a highly portable all-NVMe powerhouse designed for DITs, independent 3D and VFX studios, and on-the-go editors. It can handle RAW files, multi-camera projects, image sequences, and VR without breaking a sweat. Two user-swappable NVMe shuttles give you maximum throughput with ultra-low latency. With the Nomad travel case, you can take your high-speed shared media storage as carry-on luggage on a plane. There's nothing like this, it's simply the fastest and most user-friendly mobile shared media solution on the planet.

- 128GB RAM
- 6000MB/s Read-Write speeds
- 16, 32, or 64TB raw NVMe storage
- 6x 10GbE ports included

UP TO 64TB starting at $10,995.00

Post Production Finance Options Available

Jellyfish Studio

FOR SMALL TEAMS WHO NEED BIG PERFORMANCE.

Replacing the popular Jellyfish Mobile, the all-SSD desktop Jellyfish Studio brings massive leaps in speed, storage, and connectivity. Share 4K content, documentaries, feature films, episodic content, or large amounts of social media at every resolution and aspect ratio. On top of this, the Studio has tons of storage capacity. The Jellyfish software suite makes it super-easy to set up your Studio and manage your projects. Just like an all-star player, you can build your entire editing team or multimedia classroom around the Jellyfish Studio.

- 128GB RAM
- 3500MB/s Read-Write speeds
- 24TB up to 180TB raw SSD storage
- Up to 16 direct attached users, more with a switch

UP TO 180TB starting at $11,995.00

Post Production Finance Options Available

Jellyfish XT

MISSION CRITICAL WORKFLOWS DEMAND STORAGE WITHOUT COMPROMISES.

Jellyfish XT is a 2U, 24-bay Enterprise Flash powerhouse, delivering the instantaneous responsiveness that professional creatives crave. Add 2 XT-E expansions for up to 1 Petabyte of super-fast shared storage. Or add up to six Jellyfish R24-E expansions for 300TB full-Flash and up to 2.5 PB SAS HDD storage. When failure is not an option, the Jellyfish XT is the absolute best solution for large editing and VFX teams, virtual productions, live events, broadcast operations, and high-end post-production.

- Dual Xeon Gold CPU
- 756GB RAM
- 7.5GB/s to 15GB/s speeds
- Dual 100GbE

starting at $59,995.00
Post Production Finance Options Available

Jellyfish R24

THE ENVY OF YOUR SERVER ROOM.

The 4U, 24-bay SAS HDD Jellyfish R24 combines high-bandwidth connectivity with huge storage capacity. It has all the speed you need to tackle the most demanding workflows. A single R24 can hold up to 432TB of raw SAS HDD storage and deliver 4500MB/s aggregate bandwidth. Expand up to 2.1 Petabytes and 7000MB/s Read/Write speeds with up to four R24-E expansion chassis.

- Dual Xeon Silver CPU
- 512GB RAM
- Up to 16 direct attached users
- Dual 25, 50, or 100GbE options for switched environments

starting at $39,995.00
Post Production Finance Options Available

Jellyfish Tower

A SHARED STORAGE SERVER, FOR GROWING VIDEO TEAMS.

The 20-bay HDD Jellyfish Tower is a powerful and cost-effective partner for your growing business. It is quiet enough to stand on its own in your edit bay. When your operation expands, add a Jellyfish Tower expansion chassis to double your storage capacity and increase your aggregate performance.

- Dual Xeon Silver CPU
- 256GB RAM
- 3500MB/s Read-Write speeds, up to 4500MB/s with expansion
- 80-240TB raw HDD storage, up to 480TB with expansion
- Up to 16 direct attached users, more with a switch

starting at $27,995.00
Post Production Finance Options Available

Jellyfish Software Suite

Jellyfish has an extensive software ecosystem that has been specifically designed to take the complexity out of collaboration. Set up and manage your Jellyfish, connect your users, manage your workflows and media, enable remote access, connect to the Cloud, integrate with external services...all made super-easy with the Jellyfish software suite.
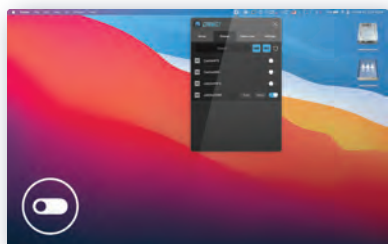

JELLYFISH CONNECT

A lightweight desktop app for Mac and Windows. Launch Connect on a new workstation, hit Configure, and start working. Connect automatically shows you all the projects and media you have access to.
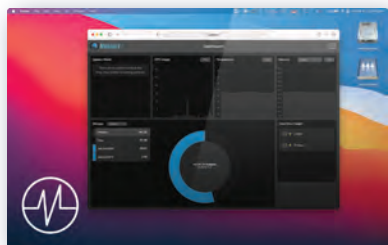

JELLYFISH MANAGER

The easiest-to-use browser-based tool for server administration ever created. Monitor the state and usage of your Jellyfish at a glance. Easily create shares, users and groups and assign permission. Configure your network and connect to the Cloud without any hassle.

KYNO FOR JELLYFISH

Offload camera cards to your Jellyfish with verified file transfers. Manage your media and find all the footage you need whenever you need with rich and descriptive metadata. Or use Media Engine's powerful transcoding features to quickly convert your media to any format, even when working off your Jellyfish from anywhere in the world.
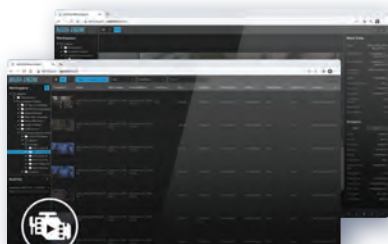

JELLYFISH MEDIA ENGINE

Offload camera cards to your Jellyfish with verified file transfers. Manage your media and find all the footage you need whenever you need with rich and descriptive metadata. Or use Media Engine's powerful transcoding features to quickly convert your media to any format, even when working off your Jellyfish from anywhere in the world.
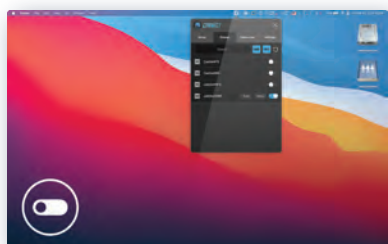

JELLYFISH REMOTE ACCESS

Access your Jellyfish remotely, download and upload media and project files, enable real-time collaborative video workflows for your team using proxies.

MacDrive 11 Standard and Pro

FOR PC

Installing OWC MacDrive on a Windows PC, you make it become "Mac aware" and can access Mac-formatted drives easily. There is nothing to launch or learn. MacDrive 11 Standard allows users to simply connect a Mac-formatted drive to your PC and it will behave like any other disk on the system. You will be able to read and write to almost any hard drive, SSD, CD, DVD, and more. You can even access SoftRAID and Apple RAID 0 and RAID 1 volumes with MacDrive 11 Pro.

It's so easy, you'll forget MacDrive is even there.

- **UNIVERSAL DRIVE ACCESS**
  Access almost any type of Mac-formatted disk including hard drives, DVDs, CDs and more.
- **COMPLETE MAC DISK MANAGEMENT**
  Take control of Mac disks by easily managing partitions, and even creating new APFS and HFS+ volumes.

starting at $49.99
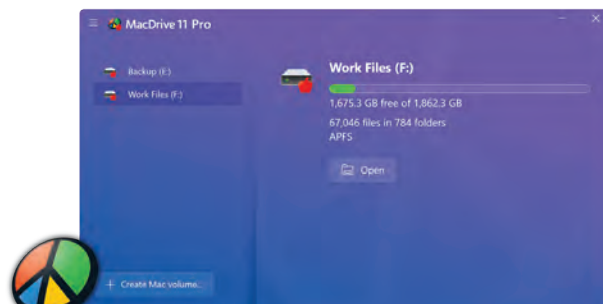

- **CRASH PROTECTION FOR MAC APFS DISKS**
  If your Mac APFS disk is unexpectedly unplugged, your existing files and data are safe, and won't be corrupted.
- **REPAIR MAC DISKS**
  Automatically detect issues with Mac disks and will fix common errors on disks (HFS+ only).
- **TIME MACHINE BACKUPS**
  Browse through Time Machine backups as well as files and folders on your PC.

Copy That

CAPTURE. CONNECT. COPY. CREATE.

Quickly transfer verified copies of your media to multiple storage devices and locations. Copy That streamlines the ingest process with lighting fast, verified copies of your files to single or multiple destinations.

- **COMPATIBLE**
  Works with ARRI, Canon, Blackmagic Design, RED, and Sony cameras as well as other storage solutions.
- **DUPLICATE**
  Offload your data to one or multiple destinations simultaneously.
- **VERIFIED COPIES**
  Multiple checksum options including XXHash-64, MD5, SHA-1, SHA-2 256, SHA-2 512.

starting at $35.00

- **DETAILED COPY REPORTS**
  Create several formats including MHL, PDF, TXT and CVS.

SoftRAID

FOR MAC & PC

SoftRAID is powerful yet easy-to-use RAID software that maximizes drive capacity, offers faster performance, and protects you from data loss. It's ideal for voluminous data roles including audio/ video production and editing, photography, graphic design, database servers, financial applications, and more.

KEY DIFFERENCES
EXPLAINED

UPGRADE YOUR MAC

Since 1988 Other World Computing has been selling an innovative range of computer accessories ranging from DIY upgrades and expansion kits for Macs. OWC's products include RAM, external drives, SSDs, Mac and PC docks, network-attached storage solutions, and many Mac upgrade kits.

Whether you're buying a "new to you" Mac or Apple device or want to extend the use life of your current trusty model, we're the full-service upgrade/enhancement source. Our Apple Certified Technicians can install OWC brand RAM and SSDs into previous generation machines and dramatically increase performance and capabilities. If you're a DIYer, you'll love our upgrade and expansion kits made easy with free how-to videos. Even the latest Apple products which can't be internally upgraded can be enhanced with external OWC products that unleash its and your potential.

BUY A NEARLY NEW APPLE DEVICE

We've eliminated any risk or worry when it comes to buying a new, refurbished, or used Apple device. Pre-owned products are thoroughly inspected, tested, and prepped by our Apple Certified Technicians. Detailed photos & description make it clear what you're getting. Some devices can be made better than new by having us install OWC brand upgrades! All of which ensures you can use your OWC Certified device immediately without issue while basking in money-saving glory. And even if you have second thoughts, no problem! We have covered with a no questions asked 14-day money back guarantee.

SELL YOUR APPLE DEVICE

We've been buying preowned Apple products since the beige Mac days. But even with a great track record of providing the fairest prices around, we wanted to push past great. That's why we brought SellYourMac (SYM) into the OWC family. SYM is the world's most trusted and highest ranked Apple® trade-in company. With SYM's instant quote and incredibly easy trade-in process and our expert reputation in the Apple marketplace, we've created the world's best experience for you to sell your Apple device.

OWC iMac Upgrades

Take your iMac to the next level with OWC Drive Upgrades, Memory and More

OWC DIY HDD Upgrade Kits

FOR IMAC (2009 - 2019)

Thanks to OWC's innovative HDD Upgrade Kits, you can install a hard drive up to 18TB in your iMac. OWC's iMac HDD Upgrade Kits are the only solutions on the market to offer full compatibility with the digital thermal reporting in Apple's SMC.

If you have a great iMac with a failing HDD, Apple's high fee only gets you the same size drive you started with. OWC is the ONLY solution on the market designed to instead let you upgrade it yourself or with a certified tech for up to 18TB of internal storage while being 100% Apple SMC compatible. No Software tricks, No hacks, an OWC innovation that ensures full hardware diagnostic compliance along with the factory fan control and temperature monitoring that Apple Expects.

- Includes all the tools you need to upgrade (or replace) the HDD in an iMac (2009 - 2019)
- Replace a failing HDD or just upgrade smaller capacity drive for up to 18TB in 2009-2019 iMac. Or go silent running with Lightning Fast SSD up to 4.0TB

Kits from $34.99

OWC DIY SSD Upgrade Kits

FOR INTEL AND POWER PC IMACS FROM THE LAST 18 YEARS.

Ditch that old spinning internal hard drive and take your iMac's performance into the stratosphere with OWC SSDs. You won't believe how fast your iMac will startup, load apps, and how large files and data opens up in a snap. Why buy new, when you can make your iMac better-than-new with an OWC SSD upgrade?

- 30-day 100% Money-Back Guarantee
- DIY install videos
- Performance & reliability at an exceptional value

DIY & Bundle kits for up to 8.0TB SSD from $19.75

★★★★★
OWC is the "Go To Vendor" for Apple parts and upgrades
Good service and support, orders are sent out in a timely fashion.

★★★★★
Perfect Fit, Great Instructions. A daunting task made easy.
Swapping a hard drive in an iMac seemed daunting and honestly, I wasn't looking forward to the experience AT ALL. OWC's install kit made the task simple and relatively painless.

OWC DIY Memory Upgrades

Unleash the true performance of your iMac. Go faster, do more, and open more with OWC. Free step-by-step install videos to help you along the way.

27-inch iMac / 5K
(2009 - 2020)

This iMac is amazingly easy to upgrade. All it takes is 10-20 minutes popping off a rear memory cover, install OWC Memory, close, and your iMac just went into hyperspeed.

Up to 128GB of DIY Memory from $33.99

21.5-inch iMac / 4K
(2009 - 2019)

The smaller sized iMacs require going inside to install more memory. OWC makes it a DIY step-by-step process with a free install video and all the tools required to make your machine OWC fast.

Up to 128GB of DIY Memory from $24.99

Memory for iMac Pro!
Install up to 512GB from $199.99

We also have memory for pre 2009 iMacs as well!

About Us

Other World Computing (OWC®), founded in 1988, provides Mac and PC enthusiasts with reliable solutions for computer hardware, accessories, and software at both the consumer and professional levels.

OWC's products are intended to serve as the life-extending foundation of personal and/or professional digital life, from capture to completion, enabling users to maximize their technology investments. The company has extended its quality, long-term solutions for creative professionals to serving enterprises, small businesses, and education administration.

OWC's award-winning team of technologists, engineers, creatives, and professionals have a passion for improving technology and are dedicated to bringing the best solutions that last and true leadership in doing so sustainably for the benefit of all.

Sustainability

We're proud to be a zero-emissions company, and always working towards minimizing our environmental impact. In 2015, we reached our goal of generating more power than we consume. Sustainability can also be economical. We provide customers with products that allow them to maximize the longevity of their technology and we extend this approach to our business operations.

WIND POWER

By installing a Vestas V39-500kW wind turbine at our headquarters in Woodstock, IL, we became the first technology manufacturer/distributor in the U.S. to become 100% on-site wind powered. We now generate more power than is consumed at this location.

GEOTHERMAL HEATING & COOLING

Corporate energy heating and cooling systems pose a large pollution risk for the communities in which they operate. That's why our Woodstock headquarters utilize a geothermal heating and cooling system. Unlike standard operations, we use an environmentally safe, biodegradable liquid in a closed loop — so there is never any risk of pollution.

SOLAR POWER

To augment our existing wind power turbine in Woodstock, we turned to solar power as an energy source for our two largest locations in Woodstock, IL and Austin, TX. The solar system installed on the roof of the building in Woodstock consists of 770 American-made Sun Power solar panels and makes it one of the largest privately-owned solar arrays in Illinois.

35 YEARS

SINCE 1988

CONTACT SUPPORT

We're dedicated to delivering products, support and advice that allow you to go further with your Mac, iOS device, gaming console and more. We strongly believe that you can always do-it-yourself, and our 100% FREE award-winning, 24/7 customer service department is always on-hand to help you with your upgrades.
